Business Partner

**Tridia Corporation Renews Membership In The
Hewlett Packard Developer Solution Partner Program (HP DSSP)**

Marietta, GA – August 19, 2008 – Tridia Corporation, a global company and leading provider of Remote Access Connectivity Software Solutions which enable companies to access, manage, support and share their remote Linux, UNIX and Windows computers and applications announced today that it will continue its membership in the HP Developer & Solution Partner Program (DSPP). As a long time business partner of HP's DSSP Program, Tridia will work closely with HP in developing product enhancements that enrich its ever expanding client base.

"Our relationship with HP has been mutually beneficial. Our clients recognize the value of being an HP Business Partnership. We are able to stay abreast of product enhancements and carry that over to our software developments. Plus, the visibility that comes along with having a partnership with Hewlett Packard is instantaneous. We are proud to continue our relationship with Hewlett Packard," says Vince Frese, President and CEO of the Tridia Corporation.

As a Business and Channel Partner of HP, the Tridia Corporation will be able to collaborate on joint programs as it applies to software compatibility and marketing programs. Inversely, HP customers will be able to take advantage of the Remote Connectivity Software Solutions Tridia provides such as iTivity or DoubleVision Pro that is HP/UX compatible.

Tridia Corporation, established in 1987, provides remote connectivity software solutions which enable companies to access, manage, support and share their remote Linux, UNIX and Windows computers and applications.
