ATLANTA, GA – FEBRUARY 10, 2009. Tridia Corporation, the leader in remote access and support software for Linux and UNIX, announces that Sectra AB has decided to expand its deployment of iTivity. Sectra AB builds on a three-year relationship with Tridia to insure responsive, secure, and HIPPA compliant remote access and support.

*"It is very gratifying that Sectra AB has chosen to expand its use of iTivity", says Vince Frese, Tridia's President & CEO. "This underscores the value that iTivity is providing Sectra AB and speaks of the trust that they place in Tridia to deliver safe, compliant results. We are proud to be a part of their team."*

Sectra AB uses iTivity to provide remote access and support for their radiology IT solutions. Since Sectra's solutions are deployed in hospitals and are used for patient diagnostics and care, the ability to respond to support and maintenance issues promptly and safely is extremely important. Sectra selected iTivity as their first choice to provide secure, compliant, remote access and support for their solutions.

#### About Sectra AB

Sectra provides industry-leading RIS/PACS, mammography and orthopedic solutions. They have over 500 employees in eleven offices worldwide, supporting more than 1,000 installations. Sectra has annual revenues exceeding \$740 million. Their headquarters is located in Linköping, Sweden.

#### About Tridia Corporation

Founded in 1987, Tridia has been the market leader in Linux and UNIX remote access and support solutions for almost two decades. Tridia has over 3,300 customers and more than 20,000 installations worldwide. Tridia launched iTivity in 2004 as the first premise-based remote access and support solution for use on private and public networks that can be customized and integrated into existing workflows and applications. Tridia's products allow ISVs, VARs and IT Solution Providers to increase worker productivity, lower support costs, improve customer satisfaction, insure compliance and increase sales.
